

Firmware/hardware internship sports tech startup

Join Vokalo, a sports audio tech startup in Aarhus trusted by international top clubs, to develop next-gen sports tech products and get a once in a lifetime experience

Who are we?

We are a passionate team with a lot of experience in entrepreneurship, elitesport, and firmware/hardware development... And we simply love sports and technology!

We capture and analyze in-game sports communication, providing sports teams with insights they haven't had before while bringing fans closer to the game. We are seeking a highly motivated intern to join our team and play a key role in the development of our next-generation sports tech product.

Who are we looking for?

If you are passionate about developing next-gen tech products and the startup spirit, we want you. You enjoy victories and share high-fives when we reach milestones, when we have good customer experiences or when a colleague gets an awesome idea.

We've got exciting challenges and solid tech support in various work areas like:

- Firmware development (C++ & Python)
- Audio algorithms
- Production bring up and test

What do you get?

You'll join a cool sports tech startup with a one-of-a-kind product used by international top football clubs. You'll help shape our product and be a big part of our journey. Our office is at Ceres Park in Aarhus - nice central spot! It's a full-time unpaid internship, where you'll gain a unique experience and learn from highly skilled and awesome colleagues. Sounds good, right?

Would you like to be a part of Vokalo?

If you are a passionate and adventurous individual who is keen to push the boundaries of technology in the sports world, then we would love to connect with you.

The applications are treated on an ongoing basis. The internship period will be agreed individually but is expected to run from August 2024 to December 2024.

If you have questions regarding the position are you welcome to contact our CEO Jens Knudsen, jens@vokalo.io
